# UVOD

Templejt je preuzet sa interneta (svi eksterni javaScript i css fajlovi).

Korisceni programski jeziki su: PHP , Html, Css, JavaScript, jQuery, Boostrap, XML.

Kao biblioteka koriscen je Boostrap.

Okruzenje je Visual Studio Code.

Baza podataka: MySQL

Sve stranice su zaštićene sesijama od neovlašćenog pristupa.

Sajt je namenjen za kupo-prodaju proizvoda.

Postoje tri vrste korisnika:

1. Neautorizovani
2. Autorizovani
3. Administratori

Samo autorizovani i administratori mogu da postavljaju oglas.

Prilikom kreiranja oglasa korisnik definiše: naslov, opis, stanje proizvoda (novo,korišćeno itd.), status cene (fiksna cena, zamena poklon, dogovor itd.), način dostave, kategoriju, podkategoriju i promociju ako želi da njegov proizvod bude bolje pozicioniran prilikom pretrage.
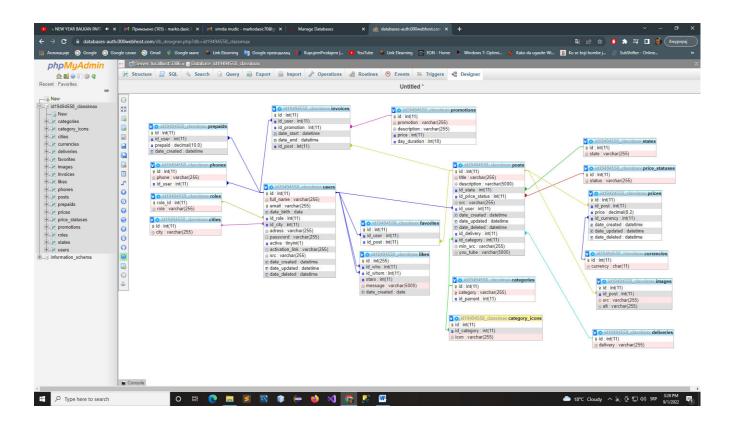

Prilikom pregleda svih proizvoda na sajtu, moguće je filtrirati pretragu po svi gore sponutim kriterijumima osim promocije.

Korisnici mogu jedni druge da ocenjuju, ali mogu ostaviti samo jednu ocenu i jedan komentar po jednom korisniku.
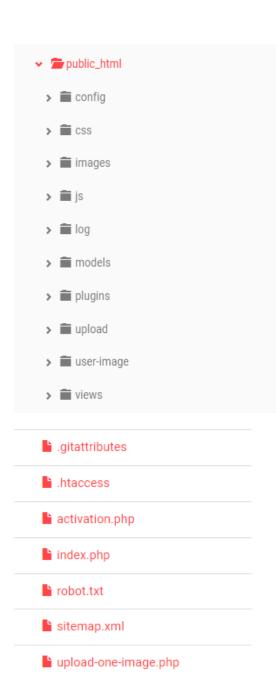

Kupovina je zamišljena tako da se korisnici sami dogovaraju oko načina plaćanja i isporuke, stoga korpa na sajtu ne postoji nego se prikazuju brojevi telefona od prodavca.

Uplata promocija zahteva da korisnik ima dovoljno prepaid credita na svom nalogu. Uplatu kredita može izvršiti tako što u svojoj kontrolnoj tabli administratoru pošalje zahtev odobravanja uplate kredita za unetu sumu.

## Category - stranica

Polje u plavoj sekciji služi za pretragu po stringu. Sa leve strane su checkbox-ovi koji se učitavjau iz baze, kao i padajuća lista sa valutama. Filtriranje radi upareno sa svim kriterijumima i sa sortiranjem za ocenu. Oglasi se uvek sortiraju tako da na vrhu budu oni oglasi koji imaju uplaćenu odgovarjuću promociju. Sadržaj kartica je identičan kao i na početnoj stranici, stim što se naslov i opis skraćuju kako kartice ne bi bile prevelike. Filtriranje po ceni se obračunava tako što se iz posebnog tekstualnog fajla (config/currency.list.txt) na serveru uzima kursna lista

valute, te se sve valute pretvaraju u dinare i tako uprođuju, ali ispusje se svaka cena u svojoj valuti. Filtriranje se vrši primenom ajaxa.

Na stranici se inicijalno prikazuje 12 oglasa klikom na dugme za paginaciju se ajaxom otvara sledećih 12 proizvoda koje zadovoljavaju kriterijume filtriranja.

## Pojedinacni proizvod stranica

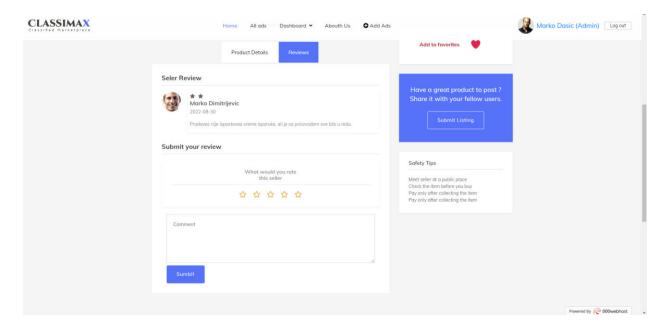

U zaglavlju se nalazi identicna forma za pretragu kao i na počenoj stranici. Ispod forme za pretragu se nalaze osnovne informacije o oglasu: ko je oglašavač, koja je nadkategorija proizvoda, lokacija odakle je prodavac, u kakvom je stanju proizvod, I načini dostave.

Slike proizvoda se nalaze u slajderu.

Sa desne strane se nalaz i cena i valuta kao i slike prodavca. Klikom na tekst Contact prikazuju se svi brojevi mobilnih telefona prodavca.
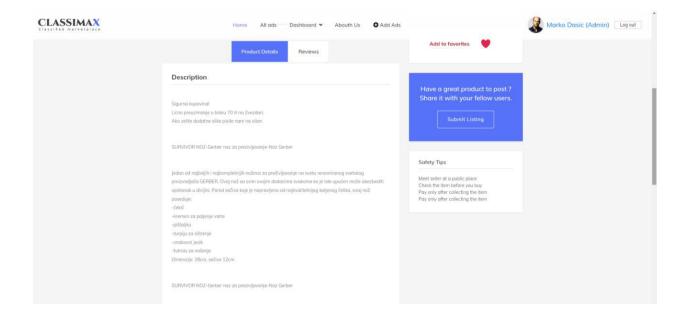

Klikom na ikonicu srca oglas se čuva u listu omiljenih oglasa, za ovu funkcionalnost korisnik mora biti ulogovan.
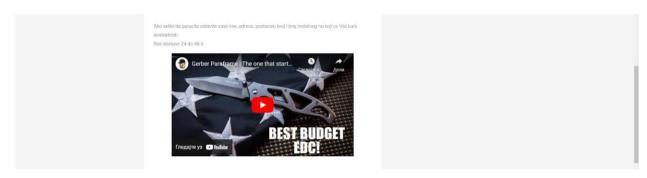

Komentari ostalih korisnika se prikazuju  u sekciji ispod slika. Svaki komentar sadrži: Sliku korisnika ocenu, tekst I datum kada je komentarisano. **Ovi komentari se ne odnose na konkretan proizvod nego na prodavca I moguće je ostaviti samo jedan komentar jednom prodavcu.**

Unos novog komentara je moguć samo ukoliko je korisnik ulogovan. Realiyacija se vrši putem ajaxa. Komentar se odmah po unosu prikazuje na interfesju bez ponovnog osvezavanja.
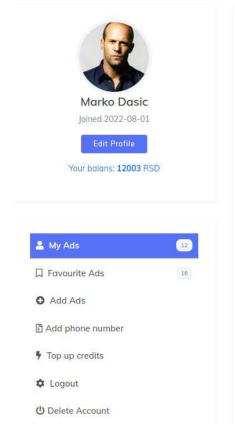

Svaki korisnik može ukloniti samo svoji komentar. Brisanje komentara se vrši takođe putem ajax-a.
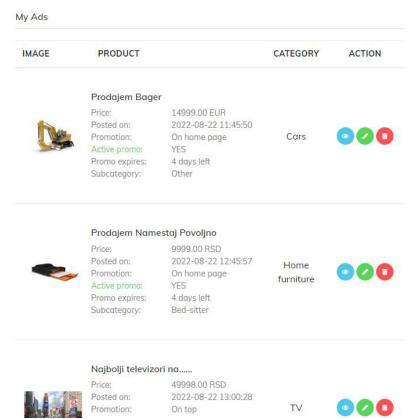

Opis se dinamički ispisuje iz baze kao i iframe tag koji prikazuje video klip sa YouTube-a

Moj profil stranica
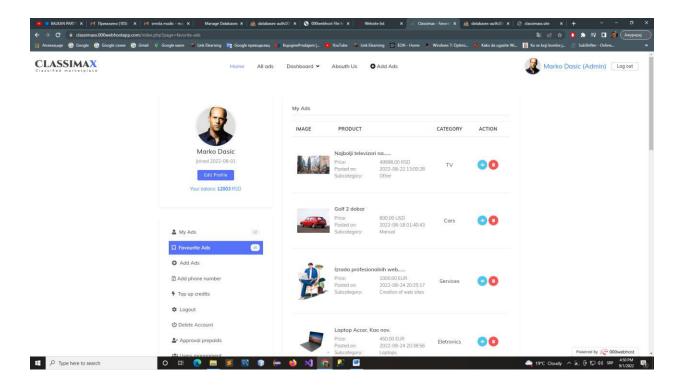

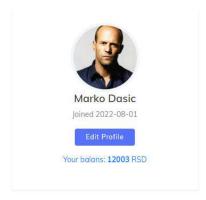

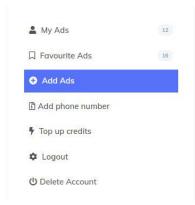

Ovo je inicijalni prikaz za korisnike sa najamnjim privilegijama.Prikazuje se korinsikova slika zajedno sa datumom kreiranja naloga i njegovim trnutnim prepaid kreditom (Prepaid Kredit se koristi za promovisanje oglasa). Njihova kontrolna tabla se sastoji iz 7 sekcija, svaka sekcija je posebna php stranica. Levi deo stranice koji se odnosi na profilnu sliku u listu linkova je posbna php stranica koja se učitava u ostalim stranicama koje prikazuju kontrolnu tablu.:
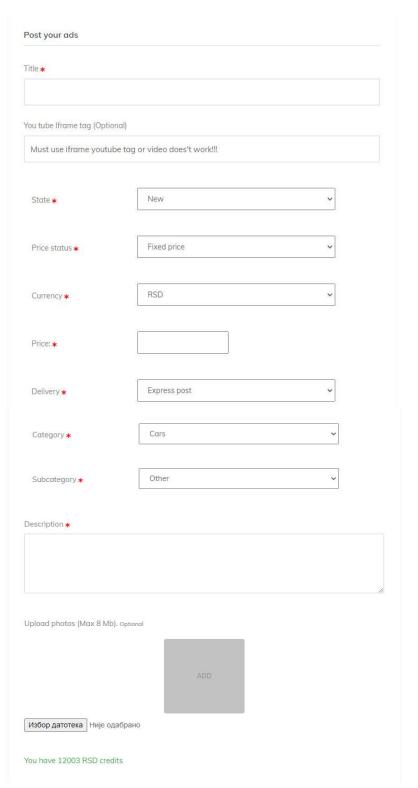

My Ads – U ovoji sekciji se nalaze svi oglasi koje je korinisk postavio. Oni se učitavaju iz baze i ispisuju u formi tabele. Svaki red sadzi: manju verziju slike proizvoda, naslov, cenu, datum objavljivaja, oznaku da li postoji promocija na tekućem oglasu, da li je promocija aktivna i ako jeste još koliko dana će trajati, nadkategoriju kao i podkategoriju, ikonicu koja prikazuje sve informacije o proizvodu, ikonicu koja otvara formu za editovanje proizvoda, ikonicu za brisanje oglasa. Na dnu ove sekcije se nalazi i paginacija ukoliko korisnik ima preko deset oglasa. Paginacija se izvršava pomoću ajax-a.

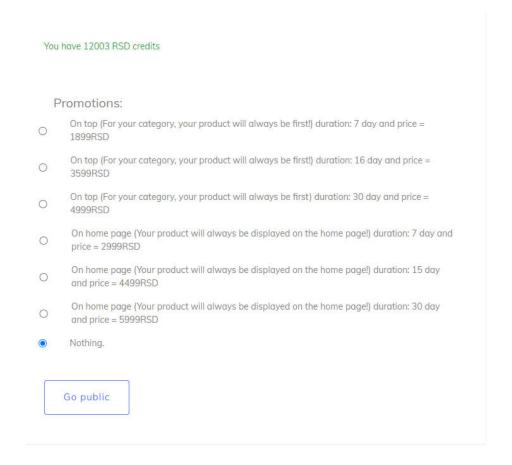

Favorite Ads - U ovoji sekciji se nalaze svi oglasi koje je korisnik dodao u listu omiljenih oglasa.
